

WLAN Radio Pigtail

WAC-PRSMANM

The WLAN Radio Pigtail cable assemblies offered by Netkrom are engineered for peak performance up to 6GHz. They are tested 100% and certified to meet performance specifications. Equipment manufacturers require certified cable assemblies to minimize system losses within known parameters and these cable assemblies meet those requirements. The manufacturing processes and raw materials are well controlled in order to provide very consistent performance from lot to lot. If you don't know what antenna connector your wireless radio has, please take a look at the Antenna Connector Type List.

Features:

- Cable length: 24" (60cm)
- Cable type: RG58U/LMR195

Type N-male connector makes the cable usable for a wide range of applications.

RP-SMA (Reverse Polarity SubMiniature version A)
